KERFOOT

Avril GROUP

Potential Cosmetics Applications

Body Butters/Creams
For use on dry skin and to replenish natural oils from the skin.

Face Cream
Its light texture would make this an excellent ingredient for us on sensitive skin and for products such 'Make Up remover lotions', good for acne-pore skin, thin skin, damaged skin.

Foot Creams
It contains useful properties for foot creams e.g. to moisturize the heels of the foot, warming foots.

Grapeseed Oil
Vitis Vinifera Seed Oil

Grades: Refined/Organic CP/Cosmetic Blend
Pack Size: 5kg/25kg/200kg/950kg

Grapeseed Oil is a vegetable oil pressed from the seeds of various varieties of Vitis Vinifera grapes, an abundant by-product of winemaking. The oil is then refined to produce a light and highly moisturizing oil.

It is rich in Vitamin E and essential fatty acids. It contains more linoleic acid than most other carrier oils. Not only is the oil enriched with fatty acid properties but in addition it contains linoleic acid (omega 6 essential fatty acid) which helps to reduce the size of skin pores, so is excellent in normalizing large pore skin, and also oleic acid making it a very stable oil.

Due to Grapeseed Oils high linoleic acid value, the oil is highly moisturizing and is light for use in skin care. The oil absorbs very quickly into the skins pores making this excellent oil for a variety of skin care applications, especially when used as a base carrier oil for essential oil fragrances.

Grapeseed Oil is a preferred cosmetic ingredient for damaged and stressed tissues because it possesses regenerative and restructuring qualities, which allow a better control of rehydration of the skin.
